Type: ☐ Telephonic ☒ Personal (copy is given to ☐ applicant ☒ applicant's representative).			
Exhibit shown or demonstration conducted:	X No. If yes, brief description:		
Agreement			
Claim(s) discussed: new claims 11-13 filed in an amenda	ment dated 5/20/97 (see attachme	ent)	
Identification of prior art discussed: Wilkinson and Romney			
Description of the general nature of what was agreed to if an agreement was reached, or any other comments: Mr. Freedman present new claims that were filed 5/20/97. He explained the invention and emphasized the medical benefits of the invention. Mr. Freedman questioned the examiner whether the recently filed claims are allowable. Upon			
brief inspection, the examiner did not feel that the claims	structurally distinguish the invent	on over the prior	r art.
The examiner explained that using a "known" device in the prior art in a different manner or to solve a different problem			
does not make the "apparatus" patentable. The examiner suggested that applicant may want to consider method claims			
in another application if the "invention" lies in a new application of a known device. The examiner felt that the elastic exercise art is very crowded and it would be very challenging to cite structure that is patentably different from the prior			
art. The examiner also suggested that the exhibits filed 9/18/96 be signed and dated in order to qualify as evidence
